Pravin Raj Prakash

Artificial Intelligence And Data Science Engineer

Address Chennai, India 600122

Phone +91 88705 63226

E-mail pravinraj2054@gmail.com

Artificial Intelligence and Data Science student with strong foundations in mathematics, algorithms, and computational problem solving. Focused in research in machine learning, generative AI, and intelligent multi-agent systems. Experienced in developing experimental AI systems and analyzing complex behaviors through rigorous evaluation and logical reasoning.

Websites, Portfolios, Profiles

- linkedin.com/in/pravin-raj-r-p
- github.com/Pravin-raj-03

Skills

- **Programming**: Python, Java, C
- **Machine Learning**: Classification, Regression, Clustering, Ensemble Methods, Reinforcement Learning
- **Deep Learning:** CNN, RNN, LSTM, GRU, Transformers, Graph Neural Networks
- **Generative AI**: GANs, Diffusion Models, Retrieval-Augmented Generation (RAG), LangChain, LLM Applications
- **AI Security**: Prompt Injection Detection, Jailbreak Prevention
- **Backend**: Flask, FastAPI, Docker, Apache Kafka, Cloud Services
- **Databases**: PostgreSQL, MySQL, MongoDB, Pinecone, ChromaDB
- **Computer Science**: Data Structures, Algorithms, Operating Systems, Computer Networks
- **Mathematics:** Linear Algebra, Differential Calculus, Optimization

Work history

May 2025 - Current

Freelancer

Fiverr, Remote

Part-Time Logo Designer
designed custom logos for **2 small business clients**, delivering scalable vector assets and incorporating **3–4 iterative revisions per project**, resulting in final designs suitable for **web, social media, and print branding**.

Education

Expected in Apr 2028

B.Tech: Artificial Intelligence and Data Science

Amrita Vishwa Vidyapeetham - Coimbatore, India

- 9.06 GPA/CGPA

MAJOR PROJECTS

AI Security – Jailbreak Prevention for LLM Systems
Tech: Python, LLM APIs, Node.js | Sep – Nov 2025
• Created a detection and mitigation pipeline for LLM vulnerabilities, lowering successful prompt-injection attempts by 3% during internal evaluation.

Multi-Agent Simulation of Luck vs Talent
Tech: Python, PyTorch, Reinforcement Learning | Dec 2025 – Feb 2026
• Developed a multi-agent reinforcement learning environment to study wealth distribution dynamics, highlighting the statistical role of randomness in financial success.

AI Prefetching System
Tech: Python, LSTM, PyTorch | Sep – Nov 2025
• Built an LSTM-driven predictive prefetching mechanism that anticipated resource-usage trends, decreasing average request latency by 23%.

Research Paper Summarizer
Tech: Python, HuggingFace, Transformers | Jan – Feb 2025
• Adapted a T5 transformer model to automatically produce concise research abstracts, cutting manual summarization workload.

Smart Classroom Robot
Tech: Python, OpenCV, Raspberry Pi, Arduino, Flask | Sep – Nov 2025
• Constructed an AI-enabled classroom assistant integrating facial-recognition attendance and voice interaction, piloted with 70 students.

Certifications

Deep Learning: Advanced NLP and RNNs – Udemy

Certificate Link - https://www.udemy.com/certificate/UC-a3ed5216-e5dc-4ecc-b9dd-a5092256ee11/

Issued: June 24, 2025
